

Water Conditioning for the 21<sup>st</sup> Century  
Eco-Friendly – Maintenance Free – 10 Year Ltd. Warranty

### Overview of the Ecoflow Catalytic Water Conditioner

The Ecoflow is a Catalytic Water Conditioner, a new innovation in water conditioning. The Ecoflow Catalytic Water Conditioner is, as the name suggests, a "**water conditioner**", not a "softener" or a "filter". The foundation of the Ecoflow is the scale controlling media, made from ceramic-metallic materials, it is actually a "Catalytic Converter" installed into your water line. It functions similarly to the Catalytic Converter on your car that converts toxic matter into neutralized, "inert" emissions, the Ecoflow Catalytic Water Conditioner converts elements that make water hard like; calcium, magnesium, boron and sodium into neutralized nano-particles that goes into solution and passes right through your water supply system.

The Ecoflow Conditioner has many positive Benefits in various industries;

- Reduce and Prevent Scale Formation.
- Inhibit Hard Water Corrosion
- Increases Soil Permeability
- Reduction in Chloride Levels in soil growth layers.
- Reduction in Water Usage
- Extend the lifespan on all Water Related Equipment e.g., Cooling Towers, Heating and Hot Water Systems, Water Pumping and Supply Systems etc.,

The Ecoflow can reduce, eliminate or improve water related problems that can impact homes, farms and businesses without using salts, chemicals, electricity and with no maintenance. Our 10 Year Limited Warranty against Defects in Materials and Craftsmanship when used under normal condition in which intended offers peace of mind on your investment into your personal property or business.
