

Residential **ECOFLOW**[®] Water Conditioner & Filtration System

Whole House & Property

Four Stage Water Conditioner
and Filtration Systems

- **No Salts!**
- **No Chemicals!**
- **No Electricity!**
- **No Waste Water Back Flushing!**
- **No Moving Parts!**
- **No Maintenance!**

Manufactured Exclusively

By: **Morrill**[®]

People will spend hundreds of thousands of dollars on a new or used home. When people buy a home they don't take into consideration the quality of the water source to the home. Some will just look at the water source as being city water or well water and that is it.

Your water supply system is one of the single most important features of your home. The piping system is fed throughout the home to supply water to sinks, showers/tubs, toilets, washing machines, dishwashers, hot water heaters and numerous outside features.

City water systems chlorinate the water to protect the water against contaminants, but in doing so the chlorine can have adverse effects on our skin and health, especially with young children.

Those who live in the country will most likely have well water which can have a multitude of harmful contaminants depending on the location and area of the country. Well water may have to be chlorinated at times to kill bacteria growth that may be in the well. There are certain procedures that have to be followed when doing this to make sure the water is not used before the system is thoroughly flushed.

Along with contaminants in the water there can be calcium, magnesium and other hard water deposits that can completely contaminant and plug your homes plumbing system. This would include not only the piping itself but, faucets, shower heads, hot water heaters and RO Units if present. This could cause high cost maintenance expenses.

NOW YOU CAN HAVE PEACE OF MIND! *The Ecoflow® 4 Stage Whole House Water Filtration System* is the superior replacement product for salt water softeners to resolve your water contamination and hard water problems.

The Ecoflow® unit has years of scientific studies and research and development that brings you the product we offer you today.

1" Ecoflow® Unit

Why the Ecoflow® was designed:

The Ecoflow® was built because of the need for a product that would reduce and/or eliminate the calcium (scale) build-up problem people are having worldwide on plumbing systems from residential to the industrial sector. Over the years there have been numerous designs and products manufactured to make an attempt to remove scale without the use of harsh chemicals, most units have failed.

Approximately 20 years ago, scientists started experimenting with the use of natural rare earth minerals to naturally brake-up scale. After a few years of experimenting and testing, a formula was developed that worked and for the past 10 years the formula has been enhanced numerous times to provide the product we offer today, which is a NSF Certified non sacrificial media.

How The Ecoflow® is built:

On all the smaller units, 3/8" through 2", we use an inner copper liner which we fill with the special NSF Certified formulated "ceramic media" and install a flow modulator at each end, then lock the "ceramic media" and flow modulator in with a stainless steel screen. This inner liner, once assembled, is slid into a stainless steel sleeve and the ends are welded in to place. The unit is then polished to a high gloss finish, labels are installed and the unit is then packaged for shipment.

How the Ecoflow® Works:

The Ecoflow® works on a 3 step process as follows:

1. Polarization:

In the first stage, water passes into the unit through flow modulators that polarize the water stream along with the minerals it contains. This action formats the water so that the following processes can impact the water stream more effectively.

2. Oxidation Reduction (Redox Process):

The propensity and ability for water to scale and harden through oxidation is reduced as water flows over the Nano-Technology developed "ceramic media" that contains a matrix of minerals and rare earth elements.

3. Ionization:

As the water stream passes over the "ceramic media", the electrons fields of the materials with in the water stream overlap with the electron fields of the materials contained within the "ceramic media." The exchange of ions is encouraged and enhanced.

Ecoflow® Benefits:

1. Improves the taste of water.
2. Reduces existing hard water scale and prevents future hard water scale build-up in pipes and water related equipment.
3. Reduces Hydrogen Sulfide in water.
4. Inhibits Algae, Fungus and Mildew growth.
5. Protects water heaters from corrosion, adding life to your water heater.
6. Clothing won't wear and fade due to hard water washing.
7. Decreases the gaseous content of water.
8. Reduces hard water spotting.
9. Extends the life of RO units if present.
10. Requires no back flush dumping like with water softeners.
11. Removes white scale build-up on fences and sidewalks.
12. Improves Septic System leaching capabilities.
13. Improves Soil Percolation and helps eliminate standing water.
14. Improves plant and lawn growth.
15. Uses NO Electricity.
16. Uses NO Chemical.
17. Uses NO Salts.

Ecoflow® Whole House Stages:

Ecoflow® Whole House System Stage 1 - Pre-Filters:

The 20 micron pre-filter will remove things like; rust, sand, dirt and numerous other large particles down to 20 micron.

Ecoflow® Whole House System Stage 2 - Activated Carbon Filters:

Water flows through high grade activated carbon filter, reducing herbicides, pesticides, Chlorine and other chemical compounds that may be present in your water.

Ecoflow® Whole House System Stage 3 - 5 Micron Post Filters:

The 5 micron filter collects any of the Carbon Fines that may leach out of the Activated Carbon Filter.

Ecoflow® Whole House System Stage 4 – Ecoflow® Water Conditioner:

The Ecoflow® Unit breaks down the hard water scale in the water and keeps it in suspension while reducing new scale build-up and removing existing scale deposits in your pipes.

Ecoflow® Ceramic Media

Whole House System Kit Comes with All Items Ready to Assemble

E5-WFS

1/2" Residential Ecoflow
with Pre Filter (Straight).

E1-WFS

1" Residential Ecoflow
with Pre Filter (Straight).

E2-WFS

2" Residential Ecoflow
with Pre Filter (Straight).

Standard with:

4.5" x 20" Line

1 - 20 Micron Prefilter

E5-WF9

1/2" Residential Ecoflow
with Pre Filter (90 Degree).

E1-WF9

1" Residential Ecoflow
with Pre Filter (90 Degree).

E2-WF9

2" Residential Ecoflow
with Pre Filter (90 Degree).

Standard with:

4.5" x 20" Line

1 - 20 Micron Prefilter

EWHS-1M

4 Stage 1 Million Gallon
Lifetime Processing
Capacity Whole
House System.

Standard with:

4.5" x 20" Line

1 - 20 Micron Prefilter

1 - Carbon Tank Filter

1 - 5 Micron Prefilter

WHS-1M

4 Stage 1 Million Gallon
Lifetime Processing
Capacity Whole
House System.

Standard with:

4.5" x 20" Line

1 - 20 Micron Prefilter

1 - KDF Tank Filter

1 - Carbon Tank Filter

1 - 5 Micron Prefilter

Whole House System Kit Comes with All Items Ready to Assemble

EHS3-H50

3 Stage 1/2" Wall Mounted Whole House System.
4.5" x 20" Line
1 - 20 Micron Prefilter
1 - Carbon Filter
For 4.5"x10" Filters:
Use Part #EHS3-H50S

EHS3-H100

3 Stage 1" Wall Mounted Whole House System.
4.5" x 20" Line
1 - 20 Micron Prefilter
1 - Carbon Filter
For 4.5"x10" Filters:
Use Part #EHS3-H100S

Big Blue Series

1/2" Outlet Line
1" Outlet Line

EHS4-H50

4 Stage 1/2" Wall Mounted Whole House System.
4.5" x 20" Line
1 - 20 Micron Prefilter
1 - Softener Filter
1 - Carbon Filter
For 4.5"x10" Filters:
Use Part #EHS4-H50S

EHS4-H100

4 Stage 1" Wall Mounted Whole House System.
4.5" x 20" Line
1 - 20 Micron Prefilter
1 - Softener Filter
1 - Carbon Filter
For 4.5"x10" Filters:
Use Part #EHS4-H100S

HS2-H50

2 Stage 1/2" Wall Mounted Whole House System.
4.5" x 20" Line
1 - 20 Micron Prefilter
1 - Carbon Filter
For 4.5"x10" Filters:
Use Part #HS2-H50S

HS2-H100

2 Stage 1" Wall Mounted Whole House System.
4.5" x 20" Line
1 - 20 Micron Prefilter
1 - Carbon Filter
For 4.5"x10" Filters:
Use Part #HS2-H100S

HS3-H50

3 Stage 1/2" Wall Mounted Whole House System.
4.5" x 20" Line
1 - 20 Micron Prefilter
1 - Softener Filter
1 - Carbon Filter
For 4.5"x10" Filters:
Use Part #HS3-H50S

HS3-H100

3 Stage 1" Wall Mounted Whole House System.
4.5" x 20" Line
1 - 20 Micron Prefilter
1 - Softener Filter
1 - Carbon Filter
For 4.5"x10" Filters:
Use Part #HS3-H100S

Whole House System Kit Comes with All Items Ready to Assemble

EHS3H-H50

3 Stage 1/2" Wall Mounted Whole House System.
2.5" x 20" Slim Line
1 - 20 Micron Prefilter
1 - Carbon Filter

For 2.5" x 10" Filters:

Use Part #EHS3H-H50S

Slim Line Series
1/2" Outlet Slim Line

EHS4H-H50

4 Stage 1/2" Wall Mounted Whole House System.
2.5" x 20" Slim Line
1 - 20 Micron Prefilter
1 - Softener Filter
1 - Carbon Filter

For 2.5" x 10" Filters:

Use Part #EHS4H-H50S

HS2H-H50

2 Stage 1/2" Wall Mounted Whole House System.
2.5" x 20" Slim Line
1 - 20 Micron Prefilter
1 - Carbon Filter

For 2.5" x 10" Filters:

Use Part #HS2H-H50S

HS3H-H50

3 Stage 1/2" Wall Mounted Whole House System.
2.5" x 20" Slim Line
1 - 20 Micron Prefilter
1 - Softener Filter
1 - Carbon Filter

For 2.5" x 10" Filters:

Use Part #HS3H-H50S
